Office Act	ion Summary			

U.S. Patent and Trademark Office PTO-326 (Rev. 11/00)

Part of Paper No. _____

Serial No. 10/609,056

Art Unit 1752

- 1. Claims 1-19 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention. The term "comprises . . . or otherwise or" in claim 1 is indefinite in intended meaning.
- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -(b) the invention was patented or described in a
printed publication in this or a foreign country or in
public use or on sale in this country, more than one
year prior to the date of application for patent in the
United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as

Serial No. 10/609,056 Art Unit 1752

obvious over Morigaki et al. Morigaki et al. (see particularly column 2, line 31 - column 4, line 63; column 37, line 67 - column 38, line 68; column 82, lines 38-55) disclose silver halide elements containing yellow color couplers and dye stabilizers or coupler solvents within the scope of those set forth in the instant claims. Compounds A-14, 41, 42 and 45 are within the scope of those set forth in the instant claims. If Morigaki et al. do not anticipate the instant claims, then it would at least be obvious to one skilled in the art to use compounds A-14, 41, 42 and 45 as the called for stabilizers in Morigaki et al. optionally in combination with the disclosed phenolic stabilizers.

3. Claims 1-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Seto et al. '713. Seto et al. '713 (see particularly column 49, lines 20-50; column 114, lines 1-15; compounds A-41, 42, 43; compounds B-8, 9, 12, 13, 17, 18) disclose silver halide elements containing yellow color couplers and stabilizers or solvents within the scope of those set forth in the instant claims. If Seto et al. do not anticipate the instant claims, then it would at least be obvious to one skilled in the art to use compounds A-41-43 or B-8, 9, 12, 13, 17 or 14 as the called for dye image stabilizers in Seto et al. optionally

Serial No. 10/609,056

Art Unit 1752

in combination with the phenolic stabilizers disclosed in Seto et al.

- 4. The prior art submitted by applicants has been considered.
- 5. Any inquiry concerning this communication should be directed to Mr. Schilling at telephone number (571) 272-1335.
